Panel Discussion

What are the Biggest IoT Security Threats, and How do we Tackle Them?

June 20, 2017

Bangalore

Participants

Dr. Harish Pant

Managing Director - Hampson Industries

Ramaraj Srinivasan

Founder – Preva Systems

Rohan Vibhandik

Cyber Security Researcher – ABB

Sachin Sinha

Founder – IQLECT

Moderator

Kaustubha Parkhi

Principal Analyst – Insight Research

Why IoT Security Matters?

- **Revenue opportunity**
- **Lack of user-awareness**
- **Low power wireless technologies**
- **Internalizing the Internet**
- **Varying QoS demands**
- **Non-conventional and non-savvy users**

Taking Strike

What is the single, most acute IoT security challenge in your view?

Round One

- **IoT adoption in the manufacturing domain**
- **Security vulnerabilities at each stage**
- **What makes IoT-enabled devices more vulnerable?**
- **Analytics platform specifications- and IoT security**

Round Two

- **IoT security budgeting considerations**
- **IoT security budget thumb rules**
- **Internal and external threats**
- **Security overheads in operations**

Round Three

- **Outlook of Indian manufacturers**
- **Experiences with government companies**
- **IoT installations and smart buildings**
- **Analytics streams of IoT installations**

The Aha Moment!

Any distinctive personal experience or anecdote, related to IoT security?
